

AHMED MASSOUD

FrontEnd Developer

ABOUT ME

I'm Ahmed Massoud. I have been learning programming for a very long time in addition to school education. I love programming and writing code. I chose website development as a field of study and I started with Front End and strive to reach a high position in this field maybe it require time, and I accept that.

Because of my hobby of writing commands and scripts, I learned Python and published some scripts .

And with my love for experimenting and discovering other fields, I learned montage and currently cooperated with a quran reader and started making this youtube video and I learned to make logos and actually worked on logos for some clients as a freelancer .

WORK EXPERIENCE

2020 - Now

FrontEnd | Freelanc

I worked on programming and developing websites for some clients, such as Portfolio, a website for the Qur'an Memorization House, and some freelance work tasks.

Apr 2024 - Now

Montage | Freelanc

I designed videos for the YouTube channel I cooperated with it. My mission was to transform the voice of the Qur'an reciter into a video with animated backgrounds and adding a subtitle for the recitation in an attractive way.

2020- Now

Logo designer | Freelanc

I have already designed some logos for some teams, such as the Byte Code team and others, and for many YouTube channels as freelance work
